EXPERIENCE

PROMPTPAGES AI (www.promptpages.ai)

JUNE 2026 - present

Founder & Lead Developer

- Founded and currently leads PromptPages AI, a browser-native AI platform that enables users to interact with any webpage through natural language using Retrieval-Augmented Generation (RAG).
 - Designed and developed a full-stack AI product including Chrome Extension (React + TypeScript), FastAPI backend, and Laravel SaaS infrastructure with subscription billing.
 - Built core features such as real-time webpage scraping, contextual AI chat, persistent conversation history, and multi-persona intelligence (Research, Development, and SEO modes).
 - Implemented secure user authentication, usage tracking, payment integration (Flutterwave), and privacy-first architecture with encrypted conversation storage.
 - Grew the product from concept to a live Chrome Web Store application while managing full-stack development, AI pipeline optimization, and user experience design.
 - Currently managing product roadmap, feature development, marketing, and user acquisition strategies.
-

BORING BYTES LLC, Illinois, USA
